Learning Opportunity

Teaching problem solving is hard. It is about helping students learn to make sense, think, and reason. To get the most out of it, we have to engage our students. We have to get them thinking and of course, get them talking! In this session, participants learn how to do just that through engaging daily problem-solving routines that focus on thinking, reasoning, and discussion. It's a perfect tool for word problems in the primary classroom. Classroom-ready resources will be shared.

Presenters

John SanGiovanni

John SanGiovanni is a mathematics supervisor in Howard County, Maryland. There he leads mathematics curriculum, digital learning, assessment, and professional development. John also works as a graduate program coordinator for mathematics leadership at McDaniel College in Maryland. He is an author of more than twenty books featuring a wide range of mathematics education topics. John is a national consultant for curriculum development and professional learning. As a former Maryland Mathematics Teacher of the Year, he

continues to be active in professional organizations recently serving on the Board of Directors for the National Council of Teachers of Mathematics and currently on the Board of Directors for the National Council of Supervisors of Mathematics.
