Learning Opportunity

Do your students struggle with reasoning about numbers, thinking flexibly about them, and estimating? Are you looking for practical, high-quality tasks to engage students and ignite discussion? In this session, participants learn about dynamic, doable activities that engage students in meaningful ways to strengthen number sense and fluency. The session will focus on subitizing, estimation, counting, magnitude, and other primary number concepts. A collection of ready-for-use resources will be provided and explored so that pursuit of number sense becomes a daily routine.

Presenters

John SanGiovanni

John SanGiovanni is a mathematics supervisor in Howard County, Maryland. There he leads mathematics curriculum, digital learning, assessment, and professional development. John also works as a graduate program coordinator for mathematics leadership at McDaniel College in Maryland. He is an author of more than twenty books featuring a wide range of mathematics education topics. John is a national consultant for

curriculum development and professional learning. As a former Maryland Mathematics Teacher of the Year, he continues to be active in professional organizations recently serving on the Board of Directors for the National Council of Teachers of Mathematics and currently on the Board of Directors for the National Council of Supervisors of Mathematics.
